

ROCKET LIGHT CR-MO INSTALLATION INSTRUCTIONS

Requirement

Fork with a drilled crown hole for caliper brake and has an axle to crown distance of 368 to 400mm.

Mounting Steps

1. Attach both legs to either the first or second platform mounts using M5x16 bolts.
2. Use M5x12 bolts to attach the tongue to the platform.
3. Attach the rack to the drilled fork crown using an M6x50 bolt, washers, and a hex sliding nut.
4. Attach the rack legs to the front hub axle.
5. Adjust the rack to the desired location and then tighten all bolts and axle nuts securely.
